## They Are Telling Fish Stories

Since the opening of the fishing season last week, many fish stories are going the rounds.

Ken McCoy is claiming the record so far this season with a 5½ pound trout which measured 24½ inches. Ed Watkin and he went out last Wednesday and fished in the Red Deer and James rivers and reported a catch of 21 good trout. The big one was caught in the James. Both Ed and Ken were very reluctant in telling the story, but Ken said it took a tow line and a car to land the fish.

Clint Reiber and Jim Kirby went out on the half holiday to fish in the Red Deer but although the limit had been taken off bull trout they did not exceed last year's limit. Clint says Jimmy almost caught one.

Charlie Mortimer got back to form on Sunday and landed 16 Loch Leven trout at the Raven river. Ross Ford and Russell Ady made up the rest of the party and caught 5 and 8 respectively.

## Will Arrange for Didsbury Fair

A meeting of the directors of the Didsbury Agricultural Society is called for Tuesday May 30th.

All the directors are urged to be present as the arrangements for the fair will be discussed and superintendents and committees appointed.

The date of the fair will very likely be July 26th.

## Central W.C.T.U. New Officials

Election of new officials Wednesday afternoon brought to a close the 27th annual convention of the Central Alberta District W.C.T.U.

Under the chairmanship of Mrs. B. L. Geeson, Didsbury, president, the convention opened on Tuesday afternoon at the Knox Presbyterian Church with a good attendance of delegates from Didsbury, Olds, Clive, Leslieville and Red Deer.

New officers elected were:

President: Mrs. Conn. Red Deer  
Vice-Pres: Mrs. Ashdown, Olds  
Treasurer: Miss High, Red Deer

Secretaries—

Recording: Miss Cressman, Didsbury.

Corresponding: Mrs. Haliburton, Red Deer.

No decision was reached as to the meeting place of 1940 convention.

## Knox United Church Notes

Unless there be a change at the last moment, occasioned by giving an opportunity to the prospective successor to Rev. J. R. Geeson to occupy the pulpit, the services next Sunday will be of a special patriotic nature in which there will be a short address relative to the Influence of the Crown and the Motherland in the National Life of Our Dominion. We give a cordial invitation to all our friends, and especially to the young people, to attend Church next Sunday.

## Election to be Held Monday, June 12th

The Hospital Agreement By-Law will be presented to the proprietary electors of Didsbury at an election to be held on Monday, June 12th.

The by-law is to authorize the Town to enter into an agreement with the Municipal Districts of Mountain View and Westerdale to build and equip a hospital at Didsbury.

A two-third majority vote will be required to pass the by-law.

On the same day an election will be held for a Councillor, to serve the unexpired term of F. H. Budgeon, who has resigned.

The nominations will be received on Monday, June 5th, from 11 a.m. to 12 noon at the town office.

## Calgary Power Co. Cooking School.

Economy and time saving was the theme of the Cooking School which was held under the auspices of the Calgary Power Co. at the Opera House on Monday and Tuesday evenings. Seventy or eighty interested ladies attended the school and very interesting lectures and demonstrations were given by Miss Marianne Pearson and Miss Shirley Scott, home economic experts.

On Monday evening Miss Pearson gave a demonstration of plug in electric appliances such as refrigerators, roasting ovens, sandwich toasters and gave instructions as to the use of small electrical appliances. She displayed the food cooked and handed out samples of it.

The prizes were won by Mrs. George Liesemer, automatic electric iron; Mrs. Bert Fisher and Miss Alice Rennie, pin-up lamps; Mrs. Ross Ford and Mrs. D. Edwards, packages of lard.

On Tuesday evening Miss Scott spoke on the use of a 1939 electric range. She demonstrated the test for speed of the range and control and heat for cooking. She also gave a talk on electric rates and the cost of operating a range for family use.

At both meetings a number of recipes compiled by the Home Service Dept. of the Calgary Power Co. were demonstrated.

The prize winners on Tuesday evening were Mrs. Jim Sheils, electric iron; Mrs. Art Reiber and Mrs. George Liesemer, pin up lamps.

## Provide \$200,000 For Jasper Highway

One of the big news items of the past week was announcement by the provincial public works department of expenditure of \$200,000 on improving the Jasper highway. Of this amount \$50,000 will be provided by the Dominion government, \$150,000 by the province.

The program includes reconditioning of the highway for a considerable distance west of Edson, while east of that town reconstruction operations will be undertaken over considerable stretches. Some contracts have been awarded already, in order to expedite "blotter" surfacing on this route during the present season.

Heavy tourist traffic to Jasper and other parks this season should result from these highway improvements, it is believed by officials of the Alberta Motor Association.

For some years the A.M.A. has conducted a vigorous campaign for hard surfacing of highways, pointing out this is essential if Alberta is to win its proper place among the provinces bidding for tourist trade.

In Eastern Canada huge expenditures are being made to improve highways for tourist traffic purposes. In Quebec, for example, the vote for highway construction amounts to \$18,000,000, indicating the trend in the East to meet the needs of the times from tourist industry aspect.

## Local Minister Receives Call To Okotoks

REV. J. R. GEESON, M.A., B.D.

At the Official Board meeting of the Knox United Church which was held on Monday, May 22nd, Rev. J. R. Geeson made the announcement that he had received a call to become the minister of the pastoral charge of the United Church of Okotoks.

He informed the members that he would accept this call subject to the action of the Settlement Committee of the Conference, which will meet in session this week in Calgary. His resignation from this pastoral charge was accepted with deep regret, and in response the minister expressed his appreciation of the many kindnesses he had received from the officials, members and friends of the Church. This resignation is expected to take effect by the first of July next.

The Board decided that the matter of a successor to Mr. Geeson be left to the Settlement Committee, after considerable discussion. It was felt that the time was too short to permit of securing a suitable minister and that the Settlement Committee would be in the best position to judge the needs of this Church.

The Board of Managers was re-organized for the year, with the appointment of Dr. J. L. Clarke as chairman and Mr. T. H. Morris as secretary-treasurer.

## Will Not Publish Mallard Magazine

Information has been received by the Didsbury Fish and Game Association that the "Mallard" magazine will not be published at the present time.

"Ducks Unlimited" claims that due to the uncertain European situation it is not considered the proper moment to launch any new feature.

The directors of the Fish and Game Association regret very much that this has happened because they believe the promise of the publication of this magazine was an inducement to take a membership in the association.

## DIDSBURY MARKETS.

## Delegation Interviews Highways Commissioner

Mayor Reiber, Councillor Gooder and Reeve Archer went to Edmonton on Friday to interview the Provincial Highway Commissioner with regard to a road from the highway to Didsbury. They received a promise that a road would be built, but as to whether it would be a new road across the golf course or an improvement of the present road past the hospital, had not yet been decided.

It was intimated that Mr. Fallow, minister of public works, would visit Didsbury before the matter was decided upon.

## Didsbury Sports, Wed., June 14th

Sports Day for Didsbury will be Wednesday, June 14th. The Race-horse Association is arranging a program of both trotting and running races and other sports.

Full details of the program will be published later.

## Will Try Raising Ring Neck Pheasants.

On Tuesday Charlie Mortimer brought five setting of Chinese pheasant eggs from Calgary and they have been distributed to members of the Fish and Game Association who will attempt to raise pheasants for liberation this fall.

The eggs were procured through the good offices of Mr. Hilliker, of the Calgary Herald, who is an ardent sportsman.

The eggs were given out to Ed Watkin, Bill Ross, Irwin Klein, Ted Culling and N. McLeod.

## "Racket Busters" at the Movies

"Racket Busters" at the Opera House this weekend. The title is self-explanatory. This picture is a thoroughgoing exposure of the cancer of racketeering eating at the heart of almost every large American community today, and, more important, it tells in detailed and exciting fashion how this malignant growth can not only be halted but eradicated.

The cast includes Humphrey Bogart, George Brent, Gloria Dickson, Allen Jenkins and Walter Abel.

Also the second episode of serial "Dick Tracy Returns."

## TOWN OF DIDSBURY

### Municipal Bye-Election

Public Notice is Hereby Given that I will attend at my office, in the Town of Didsbury, on Monday the 5th day of June, 1939, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of receiving nominations of candidates for the office of Councillor, to serve the unexpired term of F. H. Budgeon, resigned.

Given under my hand at Didsbury, Alberta, this 23rd day of May, 1939.

W. A. AUSTIN,  
Returning Officer.

## Building Activity This Spring

Plans are maturing for the building and remodelling of several houses in town this spring.

Mr. Jim Calhoun is purchasing a lot from the town west of the school and is planning to build a modern residence.

Mr. Tom Morris has purchased the W. E. Rieder residence and is moving it to the north part of town. Mr. Rieder will build a modern bungalow on his residence site.

Mr. Cliff Mortimer is digging a basement and will move and enlarge his house.

Mr. Hans Olsen has purchased the Dave Janzen cottage in East Didsbury and will move and enlarge the house on a new foundation.

## Gun Club Shoot.

The first shoot of the season was on Thursday evening last. Bill Ranton and George Hardy, new members taking part in their first shoot, made a good showing and were in the tie for second place with 18 points.

Ken McCoy and Russell Ady had a tight race for the cellar position.

Following are the scores:

Jim Calhoun	21
Erwin Kline	18
George Hardy	18
Bill Ranton	18
Leo Weige	15
Ed Watkin	15
Jim Chamberlain	13
Russell Ady	12
Ken McCoy	12

## World Traveller Calls at Didsbury

Jean de Vaudreuil, 71-year-old Belgian War Veteran who is walking around the world, called at the Pioneer office on Tuesday morning.

Leaving Belgium in 1920, his pedometer showed that he had walked 55,163 miles. He has visited all the countries in Europe, Africa, Asia, and England, Australia, New Zealand, North and South America. He has not yet visited Mexico, but intends to go there via the West Coast route.

Vaudreuil visits the town officials, newspaper and Veteran organization in each place he visits and has an interesting book of letters, photos, etc. given him and which he carries along.

## THE BRIGHT SPOT

Joins with the millions of Canadians in wishing...

Their Majesties  
a pleasant trip and happy memories of Canada.

"God Save the King"

## Worth Investigating

If statements made by George A. Hurst of Regina, as they appear in a pamphlet entitled "Salvaging the Hudson Bay Route", which has recently been widely distributed by the On-to-the-Bay Association, are well founded, it would appear that it is high time Western Canadians gave some attention to allegations that the route is being throttled and gave some consideration to a resolution recently passed by the Association.

The resolution to which reference is made reads:

"That this Association go on record as being in favor of the principle of Western Canada management of the commercial facilities of the Port of Churchill, and that they should be brought under the control and management of a Western organization in conjunction with the provincial governments of Saskatchewan and Manitoba."

In preferring his charges that the route is being undermined and rendered ineffective, partly because of lack of knowledge or indifference on the part of some who should have the western farmers' interests at heart and partly because the grain trade, in conjunction with remote officialdom is hedging the use of the route with impossible restrictions, Mr. Hart should know whereof he speaks, for during most of the construction period and the entire time the port has been in operation up to January, 1938, he resided and worked at Churchill as accountant for the Dominion government.

It is perhaps significant that, while the On-to-the-Bay Association disclaims any responsibility for the correctness of the statements and charges made by Mr. Hurst in his pamphlet, the Association evidently considers them of sufficient importance to warrant wide publicity for them, by making arrangements for distribution of the pamphlet and by pointing out that although the contents were published earlier in a series of articles "as far as we are aware no one has come forward to dispute the truth of the statements made."

### Inquiry Desirable

The fact that Mr. Hurst was in a peculiarly favorable position to secure the information on which he bases his premises, coupled with the sponsorship of the pamphlet by the On-to-the-Bay Association, an organization which has carefully steered clear of politics in its activities, indicates the desirability of an inquiry being made into the method of operating the route, with a view to some change in the form of management of the port and its facilities if such an investigation shows that the efficiency of the route is being sterilized by counter interests and the interests of the producers are not being protected.

When it is remembered that over fifty million dollars has been invested in the Hudson Bay railway and the Port of Churchill and its facilities and that, if Mr. Hurst is correct, the great bulk of the cost was borne by the west, no stone should be left unturned to see that the westerners' interests in this large expenditure is protected, and that it be made to yield the return which was expected of it during the half century fight to establish a short and direct export and import route between the prairies and the European countries.

If the port is being allowed to languish and the route to die of inanition, as Mr. Hurst claims when he speaks of it as the "starved and unwanted child," with specific details to support it, then no time should be lost in taking whatever steps may be necessary to revitalize the route and, if possible, to make it the important and effective artery it was intended to be.

### Interesting Suggestions

Any person who reads the pamphlet with care cannot fail to be impressed by the background of knowledge of his subject apparently displayed by Mr. Hurst and the apparent prima facie case which he makes out for a change in the administration of the port and its facilities and other proposals designed to cheapen the use of the route and enable it to return greater dividends to prairie producers and Western business.

Not the least interesting of Mr. Hurst's statements are contained in the chapter devoted to freight rates, in which he contends that the average rate on the Great Lakes from 1932 to 1937 was 4½ cents compared with an average of 8½ cents before Churchill entered the lists as a competitor.

If the figures are correct there seems to be some foundation for the assumption that, even though only a small fraction of the crop was handled through the Bay route during that period, the very existence of this alternative artery had an important bearing on the returns to the farmer for the entire crop in that six-year period, provided the savings were returned to the producer.

On this basis, what might happen to rates on the Great Lakes were the Bay route to be rendered a negative factor and the Port of Churchill closed up as "a white elephant" is a subject for interesting speculative thought.

Even if some of Mr. Hurst's claims could not be established, the suggestion that the administration of the port be turned over to a body of Westerners, who could be relied upon, not only to stem stagnation or worse, but actively to promote business for the Hudson Bay route seems to be a rational one. After all, the west is the parent of the project and could surely be depended upon to nourish the youngster much better than a foster mother.

### King George Opens Hospital

#### Children's Wings Bear Names Of The Two Royal Princesses

The King opened the new Westminster Hospital in London, and, in reply to an address on behalf of the governors of the institution, said the new buildings "incorporate the latest improvements in hospital planning and technique." His Majesty announced that the children's wings of the new hospital will bear the names of his daughters and be known as "Princess Elizabeth Wing" and "Princess Margaret Rose Wing."

### Would Be Handy

To hit the market soon is a patented rain-controlled awning which automatically lowers itself after the first few drops of rain and just as automatically folds up when a downpour ceases.

A Minnesota physician has invented an oxygen mask for use during airplane flights at extreme altitudes that fits over the nose, leaving the eyes and mouth free.

England is showing more interest in wheat, according to overseas dispatches.

Weather proof mirrors have been devised for use in astronomical and optical measuring instruments.

### A New Industry

#### Iceland Spar Is Being Developed In South-West Africa

A new industry the production of Iceland Spar is being developed in South-West Africa, the former German colony which is now held under mandate by the Union of South Africa.

Iceland Spar was discovered in the territory in 1926. It is a crystal which has wide uses in the manufacture of optical instruments, television sets, color photography apparatus, laboratory instruments, periscopes and range-finding devices.

Reserves are such that South-West Africa would be able to fulfill the requirements of the entire world.

The grave of Publius Nonius Zethus, ancient Roman banker, had a basket, a flour mill, a sifter, and various containers and baking molds carved on his tomb.

In England, 85 persons have incomes of more than a half million dollars a year.

There are estimated to be 290 radio sets in operation for each 1,000 residents of the United States.

Ammonia is obtained on a commercial scale as a by-product when coal gas is made.

### THAT REMINDS ME—

OGDEN'S IS COOL SMOKING

You'll get a lot of extra pleasure in "rolling your own" with Ogden's because it is a really cooler, better cigarette tobacco. Of course you'll roll them with the best papers—"Chantecler" or "Vogue"

### Police Dog Made Good

#### Turned In Neat Job On First Assignment For R.C.M.P.

The newest member of the Royal Canadian Mounted Police in Nova Scotia, trained police dog, turned in a neat job on its first assignment. The dog found two young Indian boys a few hours after they strayed away from the Indian school at Schubencadie about 440 miles from Halifax.

When the boys were reported missing, the police were called in. A piece of clothing of one of the boys gave the dog the scent and it started into the dense woods back of the school. The first youth was found about 6½ miles from the building.

After the dog was returned to the school for a rest, it picked up the scent of the second youth from one of his shirts. It followed the original trail for five miles, then branched off and at a distance of three and a half miles farther on the other boy was discovered.

The dog, a 20-months-old Doberman Pinscher, is one of 33 used by police in Canada. It was trained at the Regina headquarters.

### A Universal Alphabet

#### Has Been Perfected By An Engineer In Australia

To aid children in learning foreign languages J. R. Arden, engineer, Sydney, Australia, after four years of work has perfected a universal alphabet, embracing all sounds used in foreign languages and of which human speech is capable. The characters for the universal alphabet are like shorthand outlines.

Hides and skins are largely a by-product, since animals are raised for their meat. The by-product, however, is a most valuable one.

### Getting Back To Normal

#### Canada's Clothing Industry Making Good Recovery From Slump

A person can do without new clothes more easily than without food. Hence a depression hits the clothing industry hard; how hard, a report just issued by the Dominion bureau of statistics indicates. The women's factory clothing industry, which of course supplies only part of the clothes Canadian women wear, but which also produces children's clothing, had an output in 1929 worth nearly \$66,500,000 factory value. By 1932 production was down to \$42,500,000. But from then on, it increased every year until in 1937 it exceeded \$60,500,000, nearly all for home consumption as exports of wearing apparel total only \$2,500,000.

The men's factory clothing industry suffered even more from the depression, its output dropping from \$50,500,000 factory value in 1929 to but little more than \$26,500,000 in 1933. But by 1937 it was up to \$45,250,000.

The combined factory output of the two industries in 1937 was thus \$105,750,000, and more than \$100,000,000 of that production was in the two central provinces. —Toronto Star Weekly.

### SELECTED RECIPES

#### JELLY PANCAKES

- 1½ cups sifted Swans Down Cake Flour
- 1½ teaspoons Calumet Baking Powder
- 1½ teaspoon salt
- 1 teaspoon sugar
- 2 egg yolks, slightly beaten
- 1 cup milk
- 2 tablespoons melted butter or other shortening
- 2 egg whites, stiffly beaten
- Sift flour once, measure, add baking powder, salt, and sugar, and sift again. Combine egg yolks and milk; add gradually to flour, beating only until smooth. Add shortening. Fold in egg whites. Bake on hot, greased griddle. Spread with jelly and roll, or serve rolled around broiled sausages or bacon. Makes about seven 7-inch pancakes.

#### FRUIT PIE, NEW STYLE

- 2 cups very finely crushed Shredded Wheat Biscuits (3-4 biscuits)
- 1 tablespoon cinnamon
- ½ cup granulated sugar
- ½ cup melted butter
- 3 cups drained cooked dried apricots
- 2 egg whites
- Combine the Shredded Wheat crumbs, cinnamon and ½ cup of the sugar, add the butter, and mix well. Pat 1½ cups of this into a 9-inch pie pan and bake 15 minutes in a hot oven of 400 degrees F. Cool slightly. Arrange the fruit in the lined pie plate, and top with a meringue made by beating the egg whites until stiff, then adding the remaining ½ cup sugar, while continuing to beat. Top with the remaining crumb mixture. Bake in a slow oven of 300 degrees F. until set and delicately browned. Cool. Makes one 9-inch pie. Serves six.

London has a women's police force consisting of one superintendent, three inspectors, 11 sergeants and 60 constables, or patrolwomen.

Happiness quite unshared can scarcely be called happiness; it has no taste.

## LEFT THE ARMY WITH RHEUMATISM

### Now Fit To Join Again

Twenty years ago, he left the army, constipated and rheumatic. To-day, he is fit and nimble—a merry, romping granddad, 61 years young.

"I came out of the army with rheumatism," he writes. "It was especially bad in my feet. I started taking Kruschen Salts, and in a few months I found relief from my rheumatism. I became nimble on my feet. Now, at 61—weighing 168—I am cheerful, energetic, and always ready to play with my grandchildren."—F.E.E.

Many people grow old long before their time because they neglect one vital need of health—the need for internal cleanliness. Eventually, they adopt the healthy Kruschen habit. Then, probably for the first time in their lives, they start getting rid every day of waste matter from the system. The result is renewed health and vigour. Ailments due to a clogged system vanish, youth returns, and life becomes really worth living.

### Visible Gold Stock

#### More Than Half Of All Gold Held In United States

The United States held 58 per cent of the visible gold stock in the world at the end of 1938, the economic study service of the League of Nations reported.

An increase of \$1,751,000,000 in American gold reserves holdings during the year resulted largely from gold shipments from Europe during international tension.

Holdings in the British stabilization fund, declined one-half during the six months ending last September 30. An additional "considerable reduction" occurred in the last three months of the calendar year.

Germany was reported to have fortified her gold reserve in March, 1938, by obtaining public and private holdings in Austria with the absorption of that country. Japan's gold reserve was "completely exhausted" in July, 1938.

### Important Discovery

#### Acid Cure For Pellagra Brings Award To Young Student

A \$1,000 award for discovery that nicotinic acid will cure pellagra was given to Conrad Arnold Elvehjem, young University of Wisconsin biochemistry professor, at the closing meeting of the American Institute of Nutrition.

Nicotinic acid is a vitamin, but for 50 years it had been kicking around on laboratory shelves with no one suspecting its ability to cure what was long one of the most serious of human diseases.

Among the exhibits at the New England Antiques Show are dolls which were the object of Queen Mary's visit to a London shop and taken to Boston for the antiques show.

Synthetic rubber made experimentally from petroleum gases is seen as much cheaper than synthetic rubber from coal.

*Going **STRONG** thanks to Shredded Wheat*

CHILDREN enjoy crisp, golden-brown Shredded Wheat because it's 100% whole wheat. It's satisfying nourishment, delicious, convenient and economical too! Four favored food value features that please the family and help the homemaker. Serve Shredded Wheat out of the familiar package, every day, with milk or cream.

The Canadian Shredded Wheat Company, Ltd. Canada  
Niagara Falls

12 big biscuits in every box

**SHREDDED WHEAT**  
MADE IN CANADA - OF CANADIAN WHEAT

## Statistics Reveal Amazing Growth Of Hospital Work During Past Half Century

Such is the amazing growth of hospitals during the past half century, that to-day if the combined hospital work being done in Canada and the United States could be classed as industry, it would rank fifth or sixth on the North American continent.

Some consolidated American and Canadian statistics brought to light at the last Ontario Hospital Association convention portray the vastness of hospital enterprise on this continent and the important contribution it is making to the health life of our people.

Some 7,000 registered hospitals are providing approximately 1,200,000 beds with a daily average of about 1,000,000 patients. It takes an annual expenditure of approximately \$1,000,000,000 to maintain and operate these hospitals. Daily payroll approximates \$1,500,000. Real estate, buildings and equipment are valued at close to \$4,000,000,000.

Statistics show that one out of every fourteen of our people goes to a hospital each year. In the year 1937, persons entered hospitals for care at the rate of one every 3.4 seconds, and a baby was born in the hospitals every 44 seconds. Of outstanding importance, however, is the great decrease in the average time the patient remains in hospital—from 26 to 30 days in the beginning of this century to 12.6 days in 1937. Mortality rates in the same period have fallen from 9 to 10 per cent. to 3 or 4 per cent., and less in many instances.

During the present year more than 10,000,000 patients will enter the hospitals of Canada and United States and will require approximately 400,000,000 nursing days' care.—Issued by the Ontario Hospital Association.

### Saved By Parachute

#### The Great Value Of Parachutes To Pilots And Observers

The fortunate escape of Mr. Geoffrey De Havilland, senior test pilot of De Havilland Aircraft, and his passenger, Mr. John Cunningham, again demonstrated the value of parachutes to pilots and observers. Mr. De Havilland was testing a new machine which got out of control. Both pilot and observer landed unhurt but the machine crashed and burst into flames.

This episode is one of the few that have occurred with British-designed planes. Only in three instances have test pilots had to resort to parachutes to save themselves. In the Royal Air Force every member of the crew of an airplane has to wear his parachute or have it within easy reach. No official figures are available as to the number of lives that are saved each year but a rough estimate for last year is 15 or 16. This, of course, includes members of the crew as well as pilots.

The standard parachute supplied to Air Force crews and pupils of civil flying training schools requires three or four hundred feet to operate, and the only cases in which parachutes have failed to open effectively have been when the machine was below five hundred feet before the occupants had to jump. Manchester Guardian.

### Practical Jokers

#### Telephone At London Zoo Has To Be Disconnected On April 1st

Julian Huxley told me a curious little fact about the zoo the other day. It appears that the zoo telephone has to be disconnected on April 1 every year because hundreds of calls are put through: "Can I speak to Mr. Lion?" "Does Mr. C. Lion (or Mr. Wolf or Mr. Beaver or Mr. G. Raffe or Mr. L. E. Phant) live there?" Apparently the technique is to leave a message for a friend asking him to ring up one or other of these plausible names at the zoo number. Mr. Huxley tells me that Dr. Vevers, the assistant director of the zoo, missed an urgent call one day because the operator thought someone was asking for Dr. Beaver and promptly disconnected the call. It would be impossible to employ anyone named Lion or Beaver on the staff of the zoo.—London New Statesmen and Nation.

### Railway Opposition

#### Thinks It's No Wonder The Railroads Have Troubles!

Get aboard a passenger train for Calgary. What do you find? A train crew from front to back of five or six. Every 15 or 20 miles a first-class depot with a station agent and probably a helper or two in attendance, the station heated and maintained by the railway company. Men along the track, a crew of them, maintaining the track for the safety of passengers and equipment. Men at each terminal to service the cars and the engines and to operate the road. In other words, a big transportation industry or utility.

On the highway paralleling the railway track will be found a bus driven by one man, making use of a highway maintained wholly by the Government. Nowhere between Calgary and Lethbridge with the possible exception of Macleod will be found any maintenance men, while ticket agents do not enter into the scheme at all—probably a small commission is paid hotel keepers at stops along the way for selling tickets and looking after the comfort of waiting passengers. And it's the same with the trucks—one man as against five or six in the running crew, and no maintenance men at all along the route.

The question is "How do the railways do it?" How do they keep in operation against a transportation system which is based on almost free use of Government facilities? How do they keep operating when they must, under the Railway Act, maintain depots every few miles, manned with agents and telegraph operators?

The whole transportation set-up is wrong. Of course, the people are entitled to the lowest cost transportation, but the railways, which we must have to move our wheat and long-haul goods, must have some protection against the competition which our building of good highways has made possible. It's foolish to rave about our railway problem when we allow such competition to flourish. Either we must expect to help the railways by special bonuses, or else we must quit building super-highways for buses and trucks. Lethbridge Herald.

### A Human Picture

#### Earl Baldwin Refers To The Common Traits To Be Found In Our People

Speaking with the background of a lifetime of intimate contact with "the Englishman" of all classes, in peace and in war, Earl Baldwin of Bewdley—the Prime Minister Stanley Baldwin of pre-Chamberlain days—uttered this classic comment in Toronto recently: "What common stuff have I found in our people? Fundamentally a stout individualism, yet with the power of co-operation, a broad and tolerant humanity, and humor. Not wit, which is of the intellect, but humor, which is of the heart. You may pity humanity, you may hate it, but humor is a saving grace—humor can only exist with a love for your kind, and even behind the laughter there are often tears." A truly human picture by a great Englishman. Stratford Beacon-Herald.

### Deserts Flying For Golf

Ruth Elder, who gained fame 13 years ago when she tried to fly the Atlantic and landed in mid-ocean, has permitted her flying license to lapse—golf is her first love now. Heroine of the disastrous Atlantic attempt in the American Girl with George Haldeman, Miss Elder has not flown her plane in three years. She and Haldeman were rescued by a steamship.

### Shows Big Increase

Canada seems to be going into cheese production in a big way of late. The factory output in March was over 1,500,000 pounds, nearly 112 per cent. increase over the output in March of 1938 and 34 per cent. ahead of February's. In Ontario the increase over production in March of 1938 was practically 179 per cent. 2306

### To Stop Hemorrhage

#### A Remarkable Agency Is Announced By Scientists

A startling discovery that the common hat-cleaning fluid and ink remover, oxalic acid, stops the "royal curse" haemophilia, and all other kinds of hemorrhage, was announced at Toronto.

The report was made to the Federation of American Societies for Experimental Biology by Arthur Steinberg and William R. Brown, of Kensington hospital, Philadelphia.

At first the assembled biologists gasped in surprise and refused to believe. Oxalic acid is a poison and is known, in test tubes, to do exactly the opposite of helping blood to clot quickly.

Even when the Philadelphians disclosed that more than 500 humans, in more than a dozen large hospitals, have had their hemorrhages stopped, and in some cases their lives saved, with oxalic acid, the biologists continued skeptical.

The unbelievable fact, that a tiny amount of the acid injected into a living body, acted exactly the opposite from its test tube ways, was finally demonstrated before a group of doubters. They went to a University of Toronto laboratory, where acid was taken from the shelf, injected into a rabbit and reduced the animal's blood clotting time from 2½ minutes to 1½.

Haemophilia has been called the "curse of kings" and "curse of the Hapsburgs" because it was common in the Hapsburg royal family and to some extent in the Spanish and the Russian royal lines.

Six American haemophiliacs, the report stated, had their time of stopping hemorrhage cut to less than that of normal persons by injections of oxalic acid.

One was a child who had scratched his throat eating rock candy. His normal time to end bleeding was 45 minutes. The acid reduced this time to 45 seconds.

It was necessary to continue giving the acid from time to time until the wounds healed in these haemophiliacs.

### An Honest Scot

#### Returns Ten Cents To Postmaster For Use Of Ink

The conscience of a man who has been filling his fountain pen from post office inkwells for 20 years has finally caught up with him.

Postmaster-General Norman McLarty received the following letter forwarded by the postmaster at Winnipeg:

"Enclosed please find 10 cents. My conscience is bothering me as I have been filling my fountain pen for 20 years from the inkwells in your post office. I think the 10 cents should about cover the cost as the ink is not of a very good quality anyway."

The letter was signed: "An Honest Scot."

Christopher Columbus' voyage of discovery to America cost only about \$7,000. He was paid about \$320 for his discovery.

## Speculation Is Rife As To Real Military Might Of Army Of Soviet Russia

### Change Would Be Dangerous

#### Sudden Change Of Policy Might Spell Disaster For Hitler

The armament race is bankrupting Germany as it will Great Britain. There are plenty of reasons why Hitler ought to be glad to stop it. But it is by no means certain that he can stop it. German industry is geared to armament. To throw it out of gear suddenly would be exceedingly risky. True, a totalitarian State ought to be able to shift its workers swiftly from one form of production to another, but at best there would be a period of confusion and difficulty; and a period of confusion and difficulty, even a relatively short period, might be perilous to the Nazi regime. For six years it has driven the German people at a terrific pace. It has reduced their standard of living drastically, and has increased their labor as it cut off their comforts. But they have endured it because they thought the dictator was certain of his purpose and clear as to his methods. A sudden reversal of policy, attended by widespread unemployment and troublesome economic readjustments, would challenge this idea; which is to say, it would challenge the faith that has kept the Germans quiet in spite of hardship. Does Hitler dare risk it? It certainly is not to be blithely assumed that he can safely take the chance.—Baltimore Sun.

### Radios For Livestock

#### Farm Woman Claims Cows Produce More Milk When Radio Installed

Salesmen for radio sets might gain new inspiration from the statement of a Kitchener district farm woman who says that milk production on her farm has been considerably increased since she installed a radio in the barn.

This agriculturist had read that cows are fond of music and so she proceeded to put the theory to the test. She now asserts that in the several months since she introduced the music the nine cows have responded by giving a total increase of a pail of milk a day. It is also said that the horses are pleased with the music and one of them dances when the harmony is turned on.

Stores engaged in the merchandising of radios can visualize the opening of a new field for their wares. If the livestock responds as well as this Kitchener farm woman says, there ought to be quite a thriving business in providing the instruments that will accelerate milk production and get the horses performing to the latest allurements of swing.—Woodstock Sentinel-Review.

The American Bible Society's highest priced edition of that book comes at \$45, morocco-bound and gold-edged.

## Indian Design in Crocheted Rug

Household Arts by Alice Brooks

Crochet Small Rugs at Big Savings

PATTERN 6362

The Indians made colorful rugs, but they didn't have the wide choice of materials to work with that you have. You can crochet this smart Indian rug (it's entirely in single crochet) of just rags or inexpensive candle-wick four strands of string. Or, if you'd be more elegant, rug yarn! Two contrasting colors or two shades of one color work out well. Pattern 6362 contains instructions and chart for making rug; illustrations of it and of stitches, materials needed; color schemes.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

The Russian army to-day is an enigma, as it was at the beginning of the Great War in 1914. Then the Allies exaggerated its fighting qualities, its equipment, its morale; the Germans and Austrians, on the other hand, deprecated it.

And yet it is well to remember that it was the Russian advance in the Autumn of 1914 which compelled Moltke to change the Schlieffen plan and to throw additional divisions from the west to the east, thus enabling Joffre to turn the tide on the Marne.

To-day the same discussion goes on. The greatest weakness of the Russian army before and during the Great War was the internal situation, and in this regard nothing has changed during the last 25 years. The chief weakness of the Red Army to-day is to be found in internal political reasons, which bind the hands of Stalin.

During recent weeks I talked with the leading statesmen, soldiers and politicians as well as publicists of the countries bordering on Russia. Their opinions on this subject differed widely. Important statesmen of two border states had diametrically opposite views concerning the armed strength of Russia.

One believed that the Russian army was strong and that only the internal situation prevented Russia from being an enormously powerful military force. The other deprecated the strength of the Red Army and expressed the belief that without Poland's help Soviet Russia could not even resist a German attack.

After listening to about 40 different authorities and experts I have come to the following conclusions: The Soviet Defence forces are adequate. The internal situation naturally constitutes a handicap temporarily preventing her from undertaking an offensive war. (The experts, however, are convinced that the Russian army is good from the defensive point of view.)

Transport is still her big problem, and for this reason a rapid mobilization is still inconceivable in Russia. But compared with 1914 even in this regard great improvements have been made.

In view of the alleged German plans the Russians have fortified the surroundings of Leningrad within a radius of 50 miles and have made this district a prohibited area. On a 30-mile stretch along the frontier from Leningrad to the Black Sea the Russians are also apparently constructing fortifications.

The Russian army is said to consist of about 26 infantry divisions, 14 cavalry divisions and two mechanized divisions. The regular army is estimated at 1,000,000 and the total trained reserves are put at 15,000,000, but naturally no equipment is yet available for such a huge army.

It is believed that mobilization would take one month. In the west Russia can put into the field in that time 10 to 11 infantry divisions, as many cavalry divisions, and two mechanized divisions.

There was much discussion about the value of the Russian air force last year. My friends believe that many "experts" have overestimated the German air force and underestimated the Russian.—Manchester Guardian.

### Ceremony Still Observed

#### English Villagers Receive Free Bread One Day Every Year

Since the reign of Queen Elizabeth the villagers of Upton Nervet, near Reading, have received free bread one day every year.

On this day housewives hang out "No Bread To-day" signs and armed with bags and baskets walk to Upton Court where the squire hands them loaves through a casement window—four pounders for each adult and two-pounders for each child.

This ceremony was originated by Lady Mervyn, Lady of the Manor in 1581. She directed in her will that loaves be distributed to the villagers every year. The cost is still charged to her estate.

Manitoba hens lay more than 10 million dozens of eggs in a year.

**The World of Wheat**

By H. G. L. STRANGE  
Director "Crop Testing Plan"

The United States Department of  
Agriculture calculates that the organ-  
ized poisoning campaign for grass-  
hopper control from the Mississippi  
River to the Pacific Coast last year  
saved farmers' crops worth \$175,000,  
000. More than 400,000 farmers  
used approximately 155,000 tons of  
mixed bait on about 30,000,000 acres  
and this furnished protection for  
more than 55,000,000 acres of crops.  
The Kansas City Times estimates  
that in the State of Kansas alone  
grasshoppers caused about 7 million  
dollars worth of loss to crops in 1938  
but that the poisoning campaign  
saved \$30,000,000 worth of crops.  
"Farmers in the West," said the  
Kansas City Times, "are now thor-  
oughly convinced of the efficiency  
of the poisoning campaign and the  
work will go on this year on an even  
larger scale."

No doubt the same proportionate  
saving by poisoning was last year  
made with the crops in Western  
Canada, although severe losses were  
experienced in Southern Saskatchewan.  
Every farmer, therefore, oper-  
ating in the grasshopper areas of  
Manitoba, Saskatchewan and Alber-  
ta, will save himself and his neigh-  
bors from severe losses of crops and  
money if he will put forth his very  
best efforts this spring and summer  
to work with his provincial and Do-  
minion government officials, who in  
turn are operating jointly with  
those in charge of the grasshopper  
campaign in the United States.

Following factors have tended to  
raise prices: Argentina extends credit  
to Spain for wheat purchases - Seed-  
ing in Australia delayed in some  
sections by excessive rains and dry-  
ness in others - Slight reduction in  
official U.S. winter wheat estimate  
- Russia complains of cold and  
drought over wide area - Many  
European crop prospects below nor-  
mal.

Following factors have tended to  
lower prices: South Africa authorizes  
exportation of 10 million bags of  
corn - Quality of Argentine wheat  
excellent and supply liberal - Rain  
improves Balkan crop prospects -  
Argentina corn offered freely; larger  
arrivals anticipated - Heavy benefi-  
cial rains received in Roumania -  
Large wheat surplus still remains in  
Canada.

**Searle Precipitation Report**

The precipitation which has occur-  
red from April 1st to May 14th,  
inclusive, combined with that which  
occurred last autumn during the  
months of August, September and  
October, and weighted for wheat  
acreage, shows the moisture condi-  
tion for the three Prairie Provinces  
as a unit to be 79 per cent of normal,  
as compared with 91 per cent last  
week.

The moisture condition in Alberta  
on May 14th was 76 per cent  
as compared with 88 per cent last  
week.

For Saskatchewan on May 14th  
the condition was 85 compared with  
95 last week and for Manitoba on  
May 14th it was 60 as compared with  
68 last week.

**Agricultural Report.**

Compiled by Dept. of Agriculture,  
Edmonton, Alberta, for Period  
Ending May 15

Notwithstanding high winds and  
soil drifting, germination of early  
sown grains has been satisfactory  
and crops are generally in fair to  
good condition. A protracted period  
of dry weather, however, will en-  
danger uniformity of germination of  
late sown grains and hasten further  
deterioration of the crops which suf-  
fer from the effects of the high wind.  
Permanent wind injury is not exten-  
sive and reseeded is restricted to  
small areas. Reserves of subsoil  
moisture are inadequate in all dis-  
tricts and crop prospects appear to  
be dependent entirely on seasonal  
precipitation.

April temperatures are reported  
above normal at many points, with  
a new record maximum for April of  
87 degrees established at Lacombe on  
April 29. Cooler weather in May  
coincided with the period of high  
winds which mitigated their harmful  
effects on the crop. On May 10 eight  
to ten degrees of frost were reported  
but no permanent injury was suf-  
fered.

Livestock and dairy conditions re-  
flect climatic factors. While stock  
have wintered well, except in the  
Peace River district, and are making  
satisfactory progress on good pasture,  
rains are needed in all districts.

Grasshoppers continue to be the  
most serious insect menace and al-  
though damage to date is negligible,  
an intensive campaign is planned to  
control the pest.

No adverse reports have come to  
hand respecting other phases of agri-  
culture, but depletion of topsoil  
through wind erosion is a major  
problem, and though serious damage  
is limited this year, the attention of  
farmers and business interests to this  
menace is necessary.

From 90 to 95 per cent of wheat is  
seeded. Germination and growth of  
early sown wheat are about average  
for this time of year. Cold weather  
and high winds have retarded maxi-  
mum development. Late sown wheat  
may suffer unless rain is received  
soon. Little reseeded of wheat is  
necessary because of soil drifting.  
Coarse grains are nearly all sown in  
the south, and in northern districts  
40 to 75 per cent is seeded. Seed  
supplies have been adequate, but in  
a few local areas where crop failure  
occurred last year, arrangements  
were made to supply financing for  
seed. Condition of forage and pas-  
ture crops is satisfactory, although  
rains would be beneficial. Forage  
crops are receiving greater attention.  
Under the Dominion-Provincial For-  
age Crop Policy, 62 municipalities  
have distributed 194,055 pounds of  
seed, as compared with 173,367 last  
year and 85,635 to 22 municipalities  
in 1937. Adoption of rotations  
using forage crops is increasing and  
will contribute materially to a more  
permanent and diversified agricul-  
ture.

Grasshoppers have hatched and  
are attacking crops in the south.  
Bait is moving from stations in the  
Lethbridge and Calgary area. It is  
expected that 150 stations may be  
needed to serve the grasshopper area  
this year. Damage from other in-  
sects is limited to a few reports of  
cutworms.

Livestock wintered well, except in  
the Peace River country, where their  
condition is fair to poor. In all dis-  
tricts, however, stock is now doing  
well on spring pasture, but general  
rains are needed to maintain feed.  
Foals, calves and lambs are good,  
showing slight increases over last  
year. Heavy losses in young pigs  
have been quite general, but despite  
this factor, increases are apparent.  
In spite of recent decreases, livestock  
prices continue fairly strong. The  
cattle market was rather slow at Cal-  
gary but Edmonton remained steady  
and swine prices recovered from a  
recent drop. A fairly brisk demand  
for work horses is reported from Cen-  
tral Alberta.

## TOWN OF DIDSBURY

## NOTICE

SYNOPSIS OF HOSPITAL BY-LAW  
No. 356  
of the Town of Didsbury

A By-Law to authorize the Mayor and Secretary-Treasurer to execute on behalf of the Town of Didsbury, the Agreement hereinafter set forth between the said Town and the Municipal District of Mountain View No. 310, and the Municipal District of Westerdale, No. 311, in connection with the erection, completion and equipment of a hospital to be known as "The Didsbury and District General Hospital."

THIS AGREEMENT made this \_\_\_\_\_ day of \_\_\_\_\_ A.D. 1939.  
BETWEEN:

The Town of Didsbury (hereinafter referred to as the Town);  
of the One Part;

Municipal District of Mountain View, No. 310; and Municipal District of Westerdale, No. 311; (hereinafter referred to as the Municipal Districts);  
of the Other Part.

WHEREAS there is in existence in the Town of Didsbury a hospital known as the Didsbury General Hospital operating jointly under an agreement between the Town and the Municipal Districts;

AND WHEREAS the Municipal Districts jointly own the site and buildings in which the said hospital is operated;

AND WHEREAS the Town and the Municipal Districts jointly own the equipment, supplies and other assets contained in, on or about the said hospital buildings;

AND WHEREAS the Municipal Districts have agreed that they will transfer all their hospital land and buildings, and the Town and the Municipal Districts have agreed that they will transfer all the said equipment, supplies and other assets to a Board consisting of representatives of the Council of the said Town of Didsbury and representatives of the Councils of the said Municipal Districts of Mountain View and Westerdale upon the condition that the said Board be appointed as aforesaid will erect a community hospital within the Town of Didsbury;

AND WHEREAS the parties hereto, being desirous of taking joint action for the purpose of providing for their respective needs for hospital facilities, have agreed as follows:

NOW this agreement witnesseth that the Town and the Municipal Districts do each agree with the other, as follows:

1. The Town will provide the Board hereinafter constituted with the money requisite to erect, complete and equip a hospital according to plans and specifications to be approved by the Town and the Municipal Districts which money is estimated to be the sum of \$30,000.00 or thereabouts.

2. The Town will provide at its own expense sidewalk approach to the corner of the site on which the hospital is built, and any necessary street lights.

3. The Town will proceed to issue debentures for the sum of \$30,000.00 bearing interest at not more than six per cent per annum, repayable in fifteen equal aggregate annual instalments of principal and interest amounting to \$3,088.86 for the purpose of providing the necessary fund for the erection, completion and equipment of the said hospital.

4. Upon the Town selling the said debenture issue of \$30,000.00 or obtaining the said sum by any other means, the Municipal Districts shall each contribute towards the cost of the erection, completion, and equipment of the said hospital, the sum by each Municipal District in fifteen equal instalments of blended principal and interest amounting in each case to \$1,029.62, provided, however, that such interest shall be at the same rate as is actually paid by the Town in respect to the aforesaid sum borrowed by the Town, the first of such instalments to be paid at the expiration of one year from the date of the bonds, debentures or other security given by the Town as security for the said loan, and thereafter on the same day in each succeeding year until the sum of \$20,000.00 with interest as aforesaid is fully paid.

5. The duty of acquiring a site, erecting, completing and equipping the hospital and its subsequent operations shall be upon the Hospital Board consisting of six (6) members. Two members shall be appointed by each of the Councils of the Town of Didsbury and the Municipal Districts of Mountain View and Westerdale by a resolution of the Councils thereof respectively;

6. As soon as conveniently may be after the Town has sold or otherwise disposed of the said debenture issue of \$30,000.00 the Town and the Municipal Districts will proceed to appoint the members of the said Board.

7. The members of the Board so appointed shall hold office until their successors are appointed, or in the event of death or resignation of any member of the Board, his successor shall be appointed in the same manner as his predecessor was appointed.

8. In the month of March in each year following the year in which the Board is constituted, the Council of the Town and the Councils of the Municipal Districts shall appoint the members of the Board as hereinafter provided:

9. The Powers of the Board shall be as follows:

(a) To apply all moneys furnished by the Town and the Municipal Districts, or any of them for the purpose of acquiring a site, erecting, completing and equipping the said hospital or any additions, alterations or extensions thereto in accordance with the said plans and specifications and any directions which may be given jointly by the Councils of the Town and the Municipal Districts.

(b) To manage and control the affairs and business of the hospital;

(c) To engage any necessary officials and servants, and to prescribe their remunerations and duties and to terminate any such engagements;

(d) To apply all moneys received by the Board on account of the operation of the hospital for the purpose of the hospital;

(e) To keep proper books of accounts;

(f) To require that any member of the Board and any employee of the Board who has the handling of any moneys entrusted to or received by the Board shall furnish a bond of a company licensed to conduct the business of bonding in the Province in a sum not less than \$5,000.00;

(g) To submit all books of accounts, vouchers, statements and documents relating to the affairs and business of the hospital to the inspection of any auditor or auditors appointed at any time or times by the Town and the Municipal Districts jointly or by any of them;

(h) To submit statements as to the financial transactions of the Board and current receipts, disbursements, assets and liabilities to the Town and Municipal Districts annually in the month of March in each year and whenever required so to do by the Town and Municipal Districts or any of them.

10. The resident sick of the Town and the Municipal Districts respectively shall have the right to admission to and treatment in the hospital in priority to any other persons.

11. The amount of the hospital charges shall be such as may be from time to time fixed by the Board and approved by the Town and the Municipal Districts respectively.

12. The Hospital Board shall be known as "The Didsbury and District General Hospital Board" and the hospital shall be known as "The Didsbury and District General Hospital."

13. The Town and Municipal Districts shall each be responsible for the payment to the Board of all hospital charges payable in respect of their respective residents which are not paid by the said residents.

14. The deficits incurred by the Board in the operation of the hospital shall be annually apportioned between and paid by the parties hereto as follows: So much of the deficit as is attributable to the hospitalization of persons who are residents of the Town or the Municipal Districts on the basis of one-third thereof to the Town and two-thirds thereof to the Municipal Districts, and the remainder of the deficit shall be apportioned between the Town and Municipal Districts in the proportion which the total number of hospital days of patients who are residents of the Town during the year bears to the total number of hospital days of patients who are residents of the Municipal Districts respectively.

15. All future capital expenditures incurred in connection with the said hospital and all unforeseen losses or expenditures incurred in connection therewith shall be apportioned between the Town and each of the Municipal Districts on a one-third share basis.

16. This agreement shall continue in full force and effect so long as any sum payable by the Municipal Districts pursuant to this agreement, or any sum which the Municipal Districts become liable to pay on account of any capital expenditure in respect of the hospital, remains owing and unpaid; and upon all such indebtedness of the Municipal Districts being paid and satisfied, either party may terminate this agreement by delivering to the other twelve months' notice in writing of its intention to terminate the said agreement, and upon the expiration of such notice, this agreement shall cease and the affairs of the hospital shall be wound up and the surplus, if any, shall belong to the Town and Municipal Districts in the proportions of one-third to the Town and one-third to each of the Municipal Districts. In the interval between the time the full amount owing by the Municipal Districts as aforesaid has been paid and the termination of this agreement as herein provided the Town shall be deemed to be the owner of an undivided one-third interest in the property vested in the Board by this agreement and the Municipal Districts shall each be deemed to be the owner of an undivided one-third interest in the said property.

17. This agreement is on the express condition that if upon the first day of June, A.D. 1941, the Town shall have failed to sell the debenture issue of \$30,000.00, or to obtain the said sum of \$30,000.00 by any other means and to pay the proceeds thereof to the Board as hereinbefore provided, this agreement shall thereupon become void and of no effect.

IN WITNESS WHEREOF the parties hereto have caused their corporate seals to be hereunto affixed in the presence of and attested by its proper officers, the day and year first above written.

DIDSBURY PIONEER—Established 1903

## Invade The Golden Eagle's Domain

The Sky-Line Trail Hike, and Trail Riders of the Canadian Rockies will share with golden eagles and where mountain peaks, the glaciers, and high alpine meadows and forest borders of two of the loveliest sections of the Canadian Rockies on their annual summer tour.

Starting each year from Banff Springs Hotel, the Riders on horseback and on foot, explore new sections of the Rockies. Carefree days are passed camera-hunting

big game, fishing in virgin lakes,

roaming in alpine gardens, mountain climbing, or basking in the sun, rescued from lethargy only by the incantations performed three daily by the cook.

The Trail Riders will leave Banff Springs Hotel early Friday, July 28, riding in easy stages over the scenic High Line to Moraine Lake in the Valley of the Ten Peaks, where they will hold their closing Pow-Wow on the evening of Tuesday, August 1. A day's rest in a most interesting location is provided enroute.

The Hikers will make headquarters at a central camp in beautiful Poudre Valley north of Lake Louise, August 17, and spend their time exploring the high country.

The Trail Riders and Trail Hikers of the Canadian Rockies plans for this year are being received enthusiastically by nature lovers all over the world judging from the number of inquiries reaching the secretary, J. M. Gibson, Windsor Station, Montreal.

**I found sweetening my morning cereal with BEE HIVE Syrup aids digestion.**

**TRY IT TOMORROW**

## WORLD HAPPENINGS BRIEFLY TOLD

Two Italian soldiers were reported to have deserted their infantry regiment posts and entered France to enlist in the Foreign Legion.

Harry Breiden of Weston, Ont., celebrated his 70th birthday on May 2 by stepping into an aeroplane and flying to Vancouver to visit his niece.

First to answer a call from Police Chief Tiedale for 1,000 men to act as special constables during the visit of the King and Queen to Niagara Falls, Ont., was an Italian citizen.

Sir Ernest MacMillan, principal of the Toronto Conservatory of Music, in an interview at Edmonton advocated national scholarships in Canada to aid impoverished musicians of exceptional talent.

Anthony Eden, former foreign secretary and newly promoted to the rank of major in the Territorial army, defended parliament's conscription decision as democratic and "expressing the nation's will."

Rosita Forbes, British author-explorer, announced she had bought an island in the British West Indies called Eleuthera, "eight miles from civilization," where she would make her home.

Japanese embassy officials announced opening in Shanghai of a new Japanese-controlled bank, called the Huahsing Commercial Bank, capitalized at 50,000,000 Shanghai dollars (\$8,000,000).

Admiral Lord Chatfield, minister for co-ordination of defence, said that with her plans for conscription, Britain would have well over 1,000,000 men for empire defence without calling on reserves or the civilian defence services.

J. H. Ross, in charge of the Alberta program under the Dominion-provincial youth training scheme, announced 40 new Alberta communities may have recreational centres next winter. Last winter 33 communities in Alberta operated training centres.

### Record For Stewardess

Miss Clara Johnson, who has just started her ninth year as a stewardess with the United Airlines, has the distinction of having flown more miles than any other woman in the world. She recently celebrated at Oakland, Cal., her 2,000,000th mile of flight.

Experiments have indicated that dull blue walls in operating rooms are helpful to the surgeon, causing less eye strain than white.

Ornithologists have determined that 800 distinct species, with 1,200 sub-species of birds exist to-day.

## How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change, usually from 38 to 42, who fears she'll lose her appeal to men, who worries about but fading, loss of pep, dizzy spells, upset nerves and moody spells.

Just get more fresh air, 8 hrs. sleep and if you need a reliable "WOMAN'S" tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist calming jittery nerves and those disturbing symptoms that often accompany change of life.

Pinkham's is WELL WORTH trying.

## Gardening

### Cultivation

Aside from the planning and planting, no early job compares in importance with cultivation. Authorities do not ask one to keep the hoe going all Summer, far from it. But they do request that the garden be dug once thoroughly first thing in the Spring, then cultivated once or twice afterwards. With proper tools the work need be no more than healthy exercise. For the purpose, there is nothing better than a little three or five fingered cultivator or a Dutch hoe. Either of these implements will make short work of a vegetable or flower garden. Cultivation serves a double purpose, it keeps down weeds and it conserves moisture.

### Stone Walls

Particularly in the smaller garden where visitors and children soon wear grass thin along the edges of flower beds or between the house and the swing or arbor, regular paths are of very practical value. With a little care they will add beauty to the rest of the garden too. Most pleasing material of all for this purpose is flagstones. These are broad, flat, thin slabs of any soft stone, usually found in abundance around certain river beds.

They are sunk flush with the ground so that the lawnmower will run over them, and at least an inch and a half of grass left between edges. Sometimes a little sand is placed under the stone for drainage.

Other walk materials are sand, cinder or brick.

### When Transplanting

Experts point out that the secret of successful transplanting is plenty of water, when the job is done and for a week or so afterwards. Of next importance will be shade and stimulant. Moving a plant is something like an operation for a human being, and the larger the specimen the more necessary the attention. With shrubbery and trees often main roots are cut and the shock is severe.

## HOME SERVICE

### THE LIFE OF THE PARTY IF YOU CAN TAP DANCE

**1 STEP 2 BRUSH 3 HOP**

### Learn to Tap in Home Lessons

A big hand at parties for the girl who knows a clever tap routine! "How does she do it?" everybody asks.

But those tricky numbers that win such "oh's" and "ah's" are just combinations of easy basic steps that you can teach yourself. Instructions, diagrams tell you how to use your feet, fit your taps to music—as our picture shows.

See how easily you can do the three-tap combination that's illustrated. Hum a favorite waltz tune, time your taps to the three distinct beats in each measure.

1. Step on left foot.  
2. Brush ball of right foot forward, grazing the floor with a clear tap sound.

3. Hop on left foot.  
In no time you pick up other basic taps and have grand fun trying combinations, making up your own. And in party, show routines, you really go to town! Snap your fingers, clap your hands, the crowd will love your swingy style.

Add to your good times! Our 32-page booklet has diagrams, directions for all the basic taps. Shows how to combine them in gay routines—waltz, military, buck for parties, club shows.

Send 15c in coins for your copy of "Tap Dancing Simplified" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

The following booklets are also available at 15c in coins each:

- 172 "Effective Phrases For All Occasions",
- 162 "Public Speaking Self-Taught",
- 129 "The Meaning of Dreams",
- 116 "How to Choose and Care for Your Dog",
- 114 "Good Letter-Writing Made Easy".

### Nature's Water Bottles

Mother Nature's water bottles are formed when silica-impregnated water filters through rocks and fills cavities. Quartz crystals gradually line the walls of the cavity, and a miniature grotto is formed. So far, not one of the museum specimens has sprung a leak.

## NEWEST SPRING-DAY FLATTERER

By Anne Adams

Here's the dress you want for those balmy days when you can go outdoors without a coat! Anne Adams has just designed Pattern 4073, making it so simple that even beginners will find it a pleasure to use.

There's seductive charm in every soft, flowing line! There's originality too (so that you'll know you won't meet your "double" in the next block!). See what an unusual neckline is formed by front fulness joining the yokes. These yokes are part of the bodice back. Indeed, as the Sewing Instructor shows, you have only six main pattern parts, counting both short or long sleeves. Trim with lace—and contrast belt, buttons and ribbon!

Pattern 4073 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 takes 3 1/2 yards 39 inch fabric and 2 1/2 yards lace edging; belt, 1/2 yard contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

It required 22 years for 20,000 men to build the Taj Mahal at Agra, India. It is the tomb of Mumtaz Mahal, favorite wife of Shah Jahan, the Great Mogul of Delhi.

## Path Of The Tornado

### Windstorms Are Not The Most Destructive Elements In Nature

This is the tornado season, and for the next several weeks we may expect to read frequent accounts of storms with their accompanying damage.

The tornado is known elsewhere, especially in Australia, and sometimes in Europe, but the greater interior valley of North America is its most common field of activity.

Scientists know what causes the tornado, but the weather bureau has never been able to predict it. Warm, wet air from the Gulf, colliding with cold air from Canada in the spring, sets up fierce atmospheric whirlwinds, which take the form of funnel-shaped clouds.

Few objects in nature are more fearsome in appearance than the tornado, a black, boiling cloud with a lashing funnel reaching from it to the earth, making progress usually from the southwest to the northeast with a terrifying roar. When such a funnel strikes buildings, trees or other objects, the destruction is usually severe. Not the wind itself causes the damage, but the vacuum created within the funnel by the terrific speed, estimated at 1,000 feet a second, of the air in the vortex.

Yet after all the tornado is not the most destructive of the phenomena of the weather. All the tornadoes in history put together did not do the damage that the one hurricane did in the East last year. A single great flood in the Ohio or Mississippi Valley has consequences more severe than a generation of tornadoes. Even an exceptional blizzard, killing off live stock, may cause greater damage than the worst of twisters.

For the average person there is small danger that he will ever be injured by a tornado, since most twisters have paths less than a quarter of a mile wide and a few miles long. As a matter of fact, fewer persons die from twisters each year than from being struck by lightning.—Kansas City Times.

### An Odd Violin

Joseph Lambert, who has been making violins in his spare time the last 35 years, fashioned one of the instruments out of a slab of Norway spruce with a jackknife and a few pieces of broken window glass last summer while he was working in the woods near Everett, Wash. The violin completed in five months.

Twelve telephone calls can be made simultaneously on each line in the new cable to be laid between the Danish cities of Copenhagen, Aarhus, and Aalborg.

The biggest eggs of modern birds are those of the ostrich which average over five inches long.

## Health LEAGUE of CANADA

presents TOPICS of VITAL INTEREST

by DR. J. W. S. McCULLOUGH

### MILLIONS OF CHILDREN PROTECTED AGAINST DIPHTHERIA

Over three million adults and children in France, over two million in Canada and over one million in the State of New York alone had, up to the end of 1935 been given toxoid as a preventive against diphtheria. Toxoid is universally believed to be innocuous even to the youngest child. Its powerful effect in the control of diphtheria has been proven over and over again.

Dr. Jules Renault of Paris says that toxoid is successful in the prevention of diphtheria in 96 to 98 per cent. of cases.

Diphtheria is disappearing from France. It has practically disappeared from the French army because every soldier is compelled to be toxoided. It is rapidly disappearing from the cities and country districts because every child on entering school must present a certificate of immunity. Fifty years ago there were 1,500 deaths a year from diphtheria in Paris, whereas in 1937 there were but 87 deaths, the mortality having dropped from eighty to less than three per hundred thousand of population. Toxoiding against diphtheria is compulsory not only in France but also in Hungary, Rumania, Poland and in the city of Geneva, Switzerland.

Because of the use of toxoid on this side of the Atlantic, Canada and the United States are eliminating diphtheria. Fourteen of the smaller Canadian cities where toxoid has been in use, have been free of diphtheria deaths for periods of five to 10 years. Other and larger cities have been remarkably free for long periods.

If, year by year, the rising generation of children are protected by the use of toxoid, diphtheria as a major problem will soon disappear from our midst.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 105 Bond St., Toronto, Ont.

CHAPTER IX. Continued

They climbed to a thousand feet, two thousand. The meadow fell away beneath them; human beings took on the value of playthings; puppet people with toy automobiles. There was likewise a toy ambulance.

At three thousand feet Gunnar nodded. "Ready? Now you go!" he shouted hoarsely.

Sarah Lynn stood up and made her bulky way toward the opening. She thought he was the palest living person she had ever seen.

"Fling yourself far from the ship. Make sure you are clear. Count a slow ten before you pull the cord!" His words came jerkily. "Wait! You are sure? You wish to go? There is no need, if you—"

Suddenly Sarah Lynn laughed aloud, filled with a wild mirth which was heady and sweet. "Still the fear of death?" she mocked him. "Life is one adventure; death is another!" She was confident, shining-eyed, radiant, but as she made a forward movement his arm shot out and caught her, pulling her against him.

"Sarah Lynn—" he said her name queerly in a choked voice, and kissed her, a fierce kiss, deep and desperate.

Then she was leaping out into swift and stinging air and was amazed to find that she did not immediately fall. The speed of the Hermod was carrying her along beneath it, faced downward, with her arms and legs spread out like a starfish. There was the strange sensation of travelling across the air rather than through it.

"He kissed me!" she exulted. "Gunnar kissed me!"

She began to fall, her body twisting and turning. Now she was looking up at the plane, now down at

the earth which was coming swiftly, perilously closer.

"There's something I must do, now!" she thought anxiously. "Oh, yes!—The cord! But where is that ring?"

Her fingers fumbled for it. It seemed to be lost in the webbing. Why hadn't she kept her hand on it all the time? She turned over again and saw the Hermod still above her but further away, somersaulted and saw the earth rushing up to meet her. Why hadn't Gunnar taken her higher than three thousand feet?

Sarah Lynn thought suddenly of her mother. She had a poignant picture of Adelaide Dana's upstairs sitting-room, pretty and peaceful, with potted plants whose every leaf glistened, and a canary warbling tenderly in an expensive cage, and quantities of framed photographs of her big brothers and herself and young Bill in all stages of infancy and childhood.

Now!

She found the ring and gave a desperate jerk.

Now! She knew exactly what would happen. The rip-cord would release the pack and the spring ribs of the little pilot chute would open instantly, catching the air and dragging the main chute out into a long line and the wind would rush in at the bottom and expand it. It simply couldn't fail! Gunnar and Conrad and Vance Le Roy had checked it thoroughly. "And even if it doesn't work," she told herself sensibly, "there is the emergency chute! I'm not rattled," she rejoiced. And Gunnar kissed me! He was white as a sheet and scared to death about me, and he kissed me! And it was the kind of kiss—

There was a weird noise which was something between a whistle and a shriek; something was fluttering overhead, and then snapping, loudly, urgently.

"It's opening!"

Then a gun went off somewhere, a shocking, thunderous boom, and her downward progress was halted so abruptly that she thought her arms and shoulders were being torn loose from her body. There were uncounted instants of confusion and terror, and then peace enveloped her.

Her chute opened and was functioning perfectly. She was floating gently, and everything was quiet about her, a sweet, celestial quietness which was soothing and comforting.

She could see the ambulance moving slowly to keep in line with her. She had lost the Hermod for the moment, but surely Gunnar would land as quickly as possible and come to her. That kiss, she felt, was not final; it must be a prelude. Even if it had been given in high excitement, it stood for an emotion which wasn't to be disposed of with this adventure. Fliers did not marry. Oh, didn't they? Then what?

There was a confused clamor of voices, cheerful, exultant.

"Good girl!" Conrad Jordan said, lifting her to her feet. "Perfect performance!"

"Atta girl!" Vance Le Roy was unfastening her harness, warmed for once into enthusiasm.

"Where is Gunnar?" Sarah Lynn demanded.

Old Pete from the airport was swearing softly and happily, paying her high praise with picturesque embellishments.

"Hold still—" Conrad Jordan had taken out his handkerchief and was wiping her face, and there was bright blood on the white linen.

"What's that from?" she asked impatiently. "I'm not hurt."

"Of course you're not, just a scratch or two when you were dragged."

"Where's Gunnar?"

"He'll be here just as quick as he can set the ship down," her uncle's friend said. "Now we'll just get aboard and let them run us back to Lynn and the old lady." He was steering her toward the ambulance.

"I'm not hurt. I'm not going to ride in that thing!" she told him spiritedly. "Where will he come down?"

"Quickest way to get there," he said, taking her arm in a firm grip. "We'll all pile in. Half a mile away!" He lifted her and set her inside and a white-suited orderly grinned and congratulated her.

"I want Gunnar," Sarah Lynn said.

"He'll be here in a jiffy. Lynn and your Granny need to see you before they're convinced you're safe, though we signaled them. Well, did it all come off according to schedule? Did it follow the pattern?"

"Oh, perfectly! It was heavenly after the chute opened," she answered, stooping to look out of the ambulance. "I don't see the Hermod."

"But you can hear him? Right over us," Vance Le Roy said.

The matriarch and the cripple and the old governess greeted her in character. The ancient woman saw in her the reincarnation of her own dim, daring youth, choosing, as she had done the brightest adventure of her period, and the paralytic sublimated his own helplessness in her courage and skill.

"I told 'em it was all plumb foolishness, tagging you round with that

hospital wagon, Sairy Lynn," her great-grandmother said. "I said you'd come down like a leaf off a tree. Us Danas we most generally do what we set our minds to! Leastways, us dark ones."

Lynn Dana smiled into her eyes. "I'm glad for you," he told her, "glad and proud. You've given me my best moment, Sarah Lynn."

Miss Pennington's high color was faded but her diction was as crisp as always. "Let me tidy your hair a bit, she bustled up to her. "I should have thought to have you wear a close net."

The girl slipped out from under

her hands. The Hermod was down and Gunnar Thorwald was out and running toward her. She went to meet him.

"I'll know as soon as I see his face," she told herself. "I'll know the first second—"

Gunnar was still white, but she saw at first glance that he was angry, and her heart turned over in terror. There was in his pale face a look of fright and of fury. She did not know what it meant.

## FEDERAL GRAIN LIMITED

## LOCAL & GENERAL

Mrs. John Hislop and daughter, Primrose Elizabeth, came home from Calgary on Tuesday.

There will be a service at St. George's Church, Harmattan on Sunday, May 28th at 3 p.m.

The Ranger Group of Girl Guides are holding a tea on June 3rd. —Watch for posters.

For dress shirts and summer underwear—give T. E. Scott a trial.

The Didsbury Band has been engaged to play at the Olds Sports Day on Wednesday, June 7.

Padre Mitchell would like to meet all the boys at the Legion meeting on Saturday. Lunch on the East.

Mrs. Mary Bolender returned on Monday from Calgary, where she had spent a couple of weeks visiting friends.

H. J. Friesen has been summoned to serve on the jury at the sitting of the Criminal Court in Calgary on Monday, June 5th.

Tom Morris, of the Didsbury Dairy, announces that he will deliver milk on Thursday night instead of Friday morning. He wants to see the King.

A. Melville Anderson, Optometrist and Optician, 224-8th. Ave. W., Calgary, established since 1910, will be in Didsbury at the Rosebud Hotel Monday, May 29th. Afternoon only.

Delmar Foote, who attended the University of Alberta during the last term, has received word that he passed each of his subjects with good marks.

Hot from New York's official court records comes "Racket Busters" to the movies this weekend, starring Humphrey Bogart & George Brent. 2nd Episode "Dick Tracy Returns."

K. Roy McLean, Optometrist and Optician, will be at Didsbury on Monday morning, June 5th. Please note that Mr. McLean is in his office 209-210 Southam Bldg., Wednesday, Thursday, Friday and Saturday each week. (2)

Mr. and Mrs. A. A. Perrin announce the engagement of their eldest daughter, Margaret Amelia Jane, to Mr. Alexander Frederick McIntosh, son of Mr. and Mrs. J. W. McIntosh. The wedding will take place in June.—Calgary Herald

Knox United Church Parlor will be fragrant with mauve and white lilacs for the Women's Missionary Society Tea on Tuesday, May 30th. Tea will be served from 3 to 6, price 25c. Bouquets of lilacs will be on sale. Your patronage for this worthy cause will be appreciated.

The C. W. Gibbs farm west of town changed hands last week, J. L. Tuggle being the purchaser. The deal was put through by C. E. Reiber. Mr. Gibbs went to Edmonton on Tuesday to visit his daughter and from there will return to New Westminster, where he will make his home.

The Olds Sports which are usually held May 24th, will this year be held June 7th, the date having been changed on account of the visit of Their Majesties. The main event will be a baseball tournament, when \$120 will be paid in prizes. There will also be a ladies' softball tournament. Torrington, Trochu, Three Hills, Olds and an All-Star Team from the Western League, have entered the baseball tournament.

Extra good value are those oxfords at Scott's—\$2.75 only, a pair.

## BIRTHS

Didsbury General Hospital

May 22nd to Mr. and Mrs. Eber Rusnell, Carstairs, a son.

## Westcott Notes.

After the Mothers' Day service at Westcott United Church on Sunday, May 14, the Junior Class of the Sunday School, of which there are five pupils, also Jean and Mary Robertson, presented their teacher, Mrs. Hughes, who is unable to continue with a silver plated butter dish in appreciation of the service she had so willingly given them for so long.

Men, for all lines of work clothes and shoes—buy at Scott's.

## Mountain View Notes

Mountain View Women's Institute met at the home of Mrs. B. St. Clair on Thursday, May 18th. Members answered roll call with an interesting item about the visit of Their Majesties, King George and Queen Elisabeth, to Canada. A demonstration on rug making will be held at the Hall on June 20th. A committee was appointed to purchase supplies for cleaning and repairing the Hall, and a Bee will be held in the near future. Members are requested to bring to the next meeting a quilt block and small donation for a family whose home was recently destroyed by fire. An auction sale of useful household articles will be held at the June meeting, which will convene at the home of Mrs. B. Atkinson. Mrs. Emerson Shantz will be the guest-speaker. Her topic will be "Education and Better Schools." Tea was served at the close of the meeting.

Congratulations of the entire district are being extended to Miss Nola Finley, who received her diploma as a full fledged nurse from the Holy Cross Hospital School of Nursing at the graduation exercises held from the Capitol Theatre, Calgary, on May 14. Mr. and Mrs. T. Finley, Mr. and Mrs. Ellis Barnes, Mrs. Ed. Barnes, Mrs. Ed. Blain, Mr. and Mrs. Everett Blain, Mr. and Mrs. B. St. Clair, Mrs. J. W. Phillipson and others, were local guests at the exercises.

Here's the best value yet—2 pairs of dress socks 29c—from Scott's.

## Scout and Cub Corner

Scouts will muster at 7:30 tonight at Headquarters.—No uniforms

Instructions for May 26.

Scouts going to Calgary on the 8:20 a.m. train are asked to be at the depot ahead of time and to secure all staffs in one bundle.

Uniforms should be of neat and trim appearance, with hat brims pressed and shoes polished. Badges, shoulder knots and lanyards must be worn correctly, with special attention to the necktie!

Headquarters in Calgary for visiting troops from the north is the North Hill Curling Rink, where the Didsbury Troop will report between 12 noon and 1:30 p.m. to await further instructions. Scouts arriving in the city by car will also report at the North Hill Curling Rink at the same hours.

Scouts returning on the 8:30 p.m. train will hand in their names to Scoutmaster Thomas, as will those also who intend to return by the later train the same evening.

## 2nd Class Tests

Signalling: Eugene Durrer and Leslie Sheils, passed.

## Proficiency Badges

Carpenter: Don Dunlop, passed. Friend to Animals: Don Dunlop, passed. Musician: Harold Feeg, passed. Printer: Lloyd Erb, passed.

## CLASSIFIED ADS.

Wanted—Kalsomining, interior painting, paperhanging or any odd jobs, prices reasonable.—Apply to Alex Kromm, Didsbury. (214p)

Modern 5-Room Bungalow (full basement) For Sale in Didsbury—Apply to Russell Berseht, Innisfail or J. V. Berseht, Didsbury. (20c)

Wanted, Cattle to Pasture.—Bush pasture able to accommodate 150 head. Pasture located 10 miles north west of Bowden Ferry. For particulars see A. R. Kendrick of Didsbury, or Fred Johns, Kewville P.O., Alberta. (194p)
